

Allotment Cultivation Survey (Winter)

Plot number		Date of survey	
Survey by (initials)		Plot holder present?	

2 (b): To cultivate the plot only for the production of fruits, vegetables and flowers...

Is there evidence that majority of the plot has been cultivated in the preceding main growing season?													
Have large areas been left unworked? Give an approximate percentage													
During autumn/winter, most of the plot should be in a state of preparation for the next growing season. Plots mostly covered with no signs of recent cultivation are not acceptable.'	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 60%;">Is it dug over?</td> <td style="width: 20%;">No / Yes</td> <td style="width: 20%;">%</td> </tr> <tr> <td>Mulched?</td> <td>No / Yes</td> <td>%</td> </tr> <tr> <td>Green manure?</td> <td>No / Yes</td> <td>%</td> </tr> <tr> <td>Winter crops?</td> <td>No / Yes</td> <td>%</td> </tr> </table>	Is it dug over?	No / Yes	%	Mulched?	No / Yes	%	Green manure?	No / Yes	%	Winter crops?	No / Yes	%
Is it dug over?	No / Yes	%											
Mulched?	No / Yes	%											
Green manure?	No / Yes	%											
Winter crops?	No / Yes	%											

2 (c): To keep the Allotment Garden clean and free from weeds...

Are weeds going to seed in large areas of the plot and causing a nuisance to plot neighbours?	
Are there uncontrolled areas of perennial weeds such as couch grass, ground elder, brambles, nettles or unmanaged grass?	

2 (d): Not to bring onto the site any refuse or decaying matter other than manure or compost in such quantities as may be reasonably required for cultivation

Is there waste on the plot? Have new waste materials been brought onto the site? Carpet, double glazing, timber, doors, tyres and building/landscaping materials should be noted.	
Is the shed fit for purpose?. Is the shed in a dangerous state and possible safety risk to anyone visiting the plot?	

Recommendation and any other notes
